

modification\_inventaire

tout\_ramasser

ramasser\_objet

```
graph LR; A[modification_inventaire] --> C[ramasser_objet]; B[tout_ramasser] --> C;
```

The diagram illustrates a flow or dependency where two separate entities, 'modification\_inventaire' and 'tout\_ramasser', both point to a single target entity, 'ramasser\_objet'. The boxes for 'modification\_inventaire' and 'tout\_ramasser' are white with red borders, while the box for 'ramasser\_objet' is gray with a black border. Blue arrows indicate the direction of the flow from left to right.
