

afficher\_inventaire

afficher\_inventaire  
\_manette

afficher\_textures\_equipe

```
graph LR; A[afficher_inventaire] --> C[afficher_textures_equipe]; B[afficher_inventaire_manette] --> C;
```

The diagram illustrates a flow or dependency where two separate functions, 'afficher\_inventaire' and 'afficher\_inventaire\_manette', both point to a single function, 'afficher\_textures\_equipe'. The first two boxes are white with red borders, while the target box is gray with a black border. Blue arrows indicate the direction of the flow from left to right.
