

charger_sauvegarde
_joueur

main

transition

init_sousbuffer

```
graph LR; A[charger_sauvegarde_joueur] --> D[init_sousbuffer]; B[main] --> D; C[transition] --> D;
```

The diagram illustrates a control flow or data dependency. Three source boxes on the left are connected by arrows to a single destination box on the right. The top box, 'charger_sauvegarde_joueur', is highlighted with a red border. The middle box, 'main', has a standard black border. The bottom box, 'transition', is also highlighted with a red border. The destination box, 'init_sousbuffer', is shaded gray and has a black border. All arrows are blue and point towards the 'init_sousbuffer' box.
