

agro_witcher

rush_joueur

orienter_monstre_vers
_joueur

```
graph LR; A[agro_witcher] --> C[orienter_monstre_vers_joueur]; B[rush_joueur] --> C;
```

The diagram illustrates a functional relationship where two separate inputs, 'agro_witcher' and 'rush_joueur', are processed together to produce a single output, 'orienter_monstre_vers_joueur'. The inputs are represented by white boxes with red borders, while the output is a larger grey box with a black border. Blue arrows indicate the flow of information from each input box to the output box.
