

deplacement_x_pers

deplacement_y_pers

interaction_coffre

```
graph LR; A[deplacement_x_pers] --> C[interaction_coffre]; B[deplacement_y_pers] --> C;
```

The diagram illustrates a relationship between three variables. On the left, two white rectangular boxes with red borders are stacked vertically. The top box contains the text 'deplacement_x_pers' and the bottom box contains 'deplacement_y_pers'. On the right, there is a single gray rectangular box with a black border containing the text 'interaction_coffre'. Two blue arrows originate from the right side of the left boxes and point towards the left side of the gray box, indicating that the two variables on the left are inputs or factors influencing the variable on the right.
